II. FISCAL YEAR AND ACCOUNTING CURRENCY.

1. Accounting period:

The Company's accounting period begins on January 01 and ends on December 31.

2. Accounting currency:

The Company's accounting currency is Vietnam Dong ("VND")

II. ACCOUNTING PERIOD AND ACCOUNTING MONETARY UNIT

1. Accounting period:

Annual accounting period begins on 01 January and ends on 31 December.

2. Accounting monetary unit

The Company maintains its accounting records in Dong (VND)

III. ACCOUNTING STANDARDS AND ACCOUNTING SYSTEM

1. Accounting policies

The Company applies the Corporate Accounting System issued pursuant to Circular No. 200/2014/TT-BTC dated December 22, 2014,

2. Announcement on compliance with accounting standards and accounting system

The Company applies the Vietnam Accounting Standards (VAS) and guiding documents issued by the State. The financial statements are prepared and presented in accordance with all regulations of each standard, circular guiding the implementation of standards and the current accounting regime being applied.

IV. ACCOUNTING POLICIES APPLIED

1. Basis of Consolidation

Subsidiaries

Subsidiaries are entities controlled by the parent company. Control exists when the parent company has the power to govern the financial and operating policies of those entities and obtains economic benefit from their activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Associated companies, joint ventures

Associates are those entities in which the Compnay has significant influence, but not control, over financial and operating policies. Joint ventrues are those entities over whose activities the Company has joint control, established by contractual agreement and requiring unanmous consent for strategic financial and operating decisions. Associates and joint ventures are those entities in which the Company normally hold 20% to 50% of voting rights in these entities.

Consolidated financial statements include the cost and income share of the Company in equity-accounted investees, after these investees have adjusted their accounting policies to be consistent with the Company's accounting policies, from the date of significant influence or joint control until the date of cessation of significant influence or joint control. If the Company's share of losses exceeds its interest in an equity-accounted investee, the carrying amount of that investment (including any long-term interests) is reduced to zero and recognition of further losses is discontinued, except to the extent that the Company has an obligation or has made payments on behalf of the investee

Transactions eliminated on consolidation

As at 30 September 2025 Unit: VND

All inter-company transactions and balances, including unrealised profits arising from inter-company transactions, are eliminated in preparing the consolidated financial statements. Unrealized gains and losses with equity-account-investees are eliminated against the investment to the extent of the Company's interest in those equity-account-investees. Unrealized losses arising from inter-company transactions are eliminated unless cost is unrecoverable.

2. Principle of cash and cash equivalents recognition:

Foreign currency transactions are converted into Vietnam Dong at the actual transaction exchange rate at the time the transaction occurs. At the end of the year, monetary items denominated in foreign currencies are converted at the average interbank exchange rate announced by the State Bank of Vietnam on the fiscal year-end date.

Actual exchange rate differences arising during the period and exchange rate differences due to revaluation of the balance of monetary items at the end of the year are transferred to financial revenue or expenses during the fiscal year.

Cash equivalents are short-term investments, not exceeding three months, readily convertible to cash, and with insignificant risk of changes in value from the date of acquisition of such investments at the reporting date.

3. Principles for recognizing trade receivables and other receivables

Trade receivables, prepayments to suppliers, and other receivables at the reporting date, if:

- Having a collection or payment term of less than 1 year (or within one operating cycle) are classified as current assets.
- Having a collection or payment term of more than 1 year (or exceeding one operating cycle) are classified as non-current assets.

4. Inventory recognition principle:

Inventories are stated at original cost. Where the net realizable value is lower than cost, inventories should be measured at the net realizable value. The cost of inventories should comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition

Inventory value is determined using the weighted-average method.

Inventory is accounted for using the perpetual inventory system.

The allowance for inventory obsolescence, established at year-end, represents the difference between the cost of inventory and its net realizable value when the cost exceeds the net realizable value.

Transportation equipments	05 - 10 years
Office equipments	03 - 10 years
Perennial garden.	03 - 09 years

5. Principle of fixed asset recognition and depreciation:

Tangible and intangible fixed assets are recorded at original cost. During their useful life, tangible and intangible fixed assets are recorded at original cost, accumulated depreciation, and net book value. Intangible fixed assets that are indefinite-lived land use rights are not depreciated.

Depreciation is calculated using the straight-line method. The estimated useful lives are as follows:

Buildings, structures	05 - 48 years
Machines, equipments	03 - 25 years
Transportation equipments	05 - 10 years
Office equipments	03 - 10 years
Perennial garden.	03 - 09 years

6. Principle of investment property recognition and depreciation:

Investment properties are recorded as the cost reduce related expenses and accumulated depreciation.

The company ceased depreciation for investment property from 2008 according to the state audit minutes at the Dong Nai Tax Department on August 26, 2008

7. Principle of recognition and capitalization of other costs:

Costs related to capital construction of investment, renovation, and upgrade of fixed assets during the period are capitalized to the fixed assets under investment, renovation, or upgrade.

Prepaid expenses related to production and business costs for the current financial year are recognized as short-term prepaid expenses and accounted for in the production and business costs for the financial year.

The calculation and allocation of long-term prepaid expenses into production and business costs for each accounting period are based on the nature and extent of each type of expense to select a reasonable method and allocation criteria

8. Principles for recognizing financial investments:

Investments in subsidiaries and associates are accounted for using the cost method. Net profits distributed from subsidiaries and Securities investments and other investments at the reporting date, if:

As at 30 September 2025

Unit: VND

- Have a recovery or maturity period not exceeding 3 months from the purchase date of the securities, are considered "cash equivalents";
- Have a capital recovery period of less than 1 year or within one business cycle, are classified as short-term assets;
- Have a capital recovery period of more than 1 year or more than one business cycle, are classified as long-term assets.

The provision for investment devaluation is made at the end of the year and represents the difference between the cost of the investments recorded in the accounting books and their market value at the time the provision is made.

9. Principles for recognizing and capitalizing borrowing costs:

Borrowing costs are recognized in production and business expenses in the year they arise, except for borrowing costs directly related to the investment in construction or production of unfinished assets, which are included in the value of those assets (capitalized) when the conditions specified in Vietnamese Accounting Standard No. 16 "Borrowing Costs" are met.

Borrowing costs directly related to the investment, construction or work in progress is calculated on the value of these assets (capitalized), including the interest on loan, distributed discount or premium when issuing bonds, the extra costs incurred in relation to the loan procedures.

10. Principles for recognizing trade payables and other payables:

Payables to sellers, other payables, and loans at the reporting date, if:

- Have a payment term of less than 1 year (or within one production and business cycle), are classified as short-term liabilities;
- Have a payment term of more than 1 year (or more than one production and business cycle), are classified as long-term liabilities;
- Surplus assets pending resolution are classified as short-term liabilities;
- Deferred income tax is classified as long-term liabilities.

11. Principles for recognizing accrued expenses, provisions for major repairs, product warranty costs, and provisions for

Actual expenses that have not yet occurred but are accrued in production and business expenses during the period to ensure that when the expenses actually occur, they do not cause a sudden increase in production and business costs, based on ensuring the principle of matching revenue and expenses. When these expenses occur, if there is a difference from the amount accrued, accounting will make additional entries or reduce expenses corresponding to the difference.

After approval by the Board of Directors, net profit after corporate income tax, after allocations to funds as stipulated in the Company's Charter and current legal regulations, will be distributed to the parties based on their capital contribution ratio.

12. Principles of Equity Recognition:

Principles of Owner's Equity Recognition:

Owner's equity is recognized by the real contributed capital.

Share premium is recognized as the positive difference between the actual issue price and the par value of shares upon initial issuance, additional issuance, or re-issuance of treasury shares.

Dividends payable to shareholders are recognized as a liability on the Company's Balance Sheet after the announcement of dividend distribution by the Board of Directors.

After approval by the Board of Directors, net profit after corporate income tax, after allocations to funds as stipulated in the Company's Charter and current legal regulations, will be distributed to the parties based on their capital contribution ratio.

13. Principles and Methods of Revenue Recognition:

Principles and Methods of Sales Revenue Recognition:

Revenue from sale of goods should be recognized when all the following conditions have been satisfied:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Company retains neither continuing managerial involvement as a neither owner nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- The economic benefits associated with the transaction of goods sold have flown or will flow to the Company;
- The costs incurred or to be incurred in respect of the transaction of goods sold can be measured reliably.

Principles and methods of service revenue recognition:

Service revenue is recognized when the outcome of the transaction can be reliably estimated. If the service delivery spans multiple

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Corporation;
- The stage of completion of the transaction at the balance sheet date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

The stage of completion of a transaction may be determined by surveys of work completed method

Principles and methods of recognizing financial income:

Income from interest, royalties and dividends and other financial income earned by the Corporation should be recognized when these

- It is probable that the economic benefits associated with the transaction will flow to the Corporation;

As at 30 September 2025 Unit: VND

- The amount of the income can be measured reliably.

Dividends and profit sharing are recognized when the Company is entitled to receive dividends or profit from its capital contribution.

14. Principles and methods of recognizing current corporate income tax expense and deferred corporate income tax expense:

Current income tax expense is determined based on taxable income and the current year's corporate income tax rate.

Deferred income tax expense is determined based on deductible temporary differences, taxable temporary differences, and the corporate

The original cost of intangible fixed assets at the end of the period, fully depreciated but still in use: VND 1.016.952.000.

This represents the land use rights for 432 square meters at 207A, National Route 1A, Quvet Thang neighborhood, Binh Thang ward, Di An town, Binh Duong province. Previously, this land was used by Sacom Real Estate Joint Stock Company for a business cooperation with Vietnam Sky Import-Export Construction Trading Services Co., Ltd. to construct and operate a five-story parking house. Now, the Company directly constructs and operates the facility, and therefore, the Company has reclassified the fixed asset due to a change in its usage purpose.

Investment property refers to the value of the office building construction with a construction area of $2,183.4 \text{ m}^2$ and a floor area of $19,509.10 \text{ m}^2$, as per the land use rights certificates.

The fair value of the investment property has not been formally assessed and determined as of 31 March 2025. However, based on the leasing situation and the market value of these assets, the Company's Board of Management believes that the fair value of the investment property exceeds its carrying amount at the end of the reporting period.

3. Financial instruments

a. Financial risk management

Overview: Financial risks from financial instruments that the Company may face include:

- Credit risk
- Liquidity risk
- Market risk

b. Credit risk

Credit risk is the risk that a party to a financial instrument or contract is not able to fulfill its obligations, leading to financial losses for the Company. The Company is exposed to credit risks from its operating activities (primarily for other receivables) and financing activities (including bank deposits, loans and other financial instruments).

Bank deposits and cash equivalents

The majority of the company's bank deposits are placed with reputable large banks in Vietnam. The company perceives the credit risk concentration on bank deposits to be low

Accounts receivable and other receivables

The company's credit risk management for customers is based on the company's policies, procedures, and control processes related to credit risk management for customers.

Unit: VND

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As at 30 September 2025

Unpaid customer receivables are regularly monitored. Provisions are assessed on a case-by-case basis for major customers as of the reporting date. Based on this, the company does not have significant credit risk concentration.

c. Liquidity risk

Liquidity risk is the risk that the Company will have difficulty in meeting its financial obligations dues to lack of funds. The Company's liquidity risk arises mainly from the fact that its financial assets and financial liabilities have different maturities.

The company monitors liquidity risk by maintaining a level of cash and cash equivalents deemed adequate by the management to finance the company's operations and to mitigate the effects of fluctuations in cash flows.

The company's management of customer credit risk is based on its policies, procedures, and control processes related to customer credit risk management.

The maturity information of the company's financial liabilities based on undiscounted contractual payment values is as follows:

	Under 01 year	From 1 year to 5 years	Total

The Board of Management believes that the risk level for payments to financial liabilities is low. The Company can settle their current portion of depts from operating cash flow and the gain from financial liabilities on due dates..

d. Market risk

Market risk is the risk that fair value or future value of cash flows from financial instruments will fluctuate with changing of market prices. Market risk includes three types: foreign currency risk, interest rate risk and other price risk.

Foreign currency risk

Foreign currency risk is the risk that fair value or future cash flows of financial instruments will fluctuate with changes in the exchange rate.

The Company manages foreign exchange risk by considering current and projected market conditions when planning future transactions in foreign currencies. The Company monitors risks associated with financial assets and liabilities denominated in foreign currencies.

Interest rate risk

Interest rate risk is the risk that fair value or future cash flows of a financial instrument will fluctuate due to changes of market interest rates. The risk of changes in market interest rates of the Company primarily related to short-term deposits and loans.

The Company manages interest rate risk by closely monitoring market conditions relevant, by that the Company will determine the appropriate interest rate policy for risk limited purpose Company

The company does not perform a sensitivity analysis for interest rate risk because interest rate changes at the reporting date is not significant.

As at 30 September 2025

Unit: VND

Other price risk

Other price risk is the risk that fair value or future cash flows of a financial instrument will fluctuate according to changes in external market prices of interest rate changes and exchange rate.

The shares held by the company may be affected by risks concerning the future value of the investment shares. The company manages stock price risk by establishing investment limits and diversifying its investment portfolio

e. Fair value

Corporation has not determined the fair value of financial assets and financial liabilities as at the end of the financial year due No. 210/2009/TT-BTC circular issued by the Ministry of Finance dated 06 November 2009 as well as the current regulations do not provide specific guidance on determining the fair value of financial assets and financial liabilities. Circular No. 210/2009/TT-BTC requirements applicable Financial Reporting Standards International presentation of financial statements and disclosures for financial instruments but not provide guidance for the equivalent assessment and recognition of financial instruments, including the application of fair value in line with the financial reporting Standards International.

4. Information about continuous operation

During the financial year, there were no activities or events that significantly affected the company's ability to continue its operations. Therefore, the company's financial statements are prepared on the assumption that the company will continue to operate

5. Comparative figures

The comparative figures are those taken from the consolidated financial statements for the year ended 31 December 2024 which were audited by AASC Auditing Firm Company Limited.
